Hi Jerry -

I've attached our Scoping Comments from 2009 where we discussed the need to analyze the potential impacts of conveyance and operations alternatives on a range of water quality parameters. In that letter, we suggest: total organic carbon, dissolved oxygen, pesticides, mercury, selenium, unknown toxicity and boron. We would be happy to discuss specifics with your technical staff and/or consultants. - Karen

Subject: water quality parameters

Hi Karen

Thanks for taking part in the agency meeting last week. You mentioned that USEPA has a list of water quality parameters that should be considered when analyzing the environmental impacts of each alternative. Could you please send us all a copy of that list, so we can pass it on to our consultants? Many thanks.

Best regards,

Jerry
